EXAMINER

WANG, GEORGE Y

ART UNIT PAPER NUMBER

2882

DATE MAILED: 08/23/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/714,225

Applicant(s)

ICHIHARA ET AL.

Examiner

George Y. Wang

Art Unit

2882

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 August 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) 4,5,8-10,14 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3,6,7 and 11-13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 17 November 2000 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 1-3, 6-7, and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuhara et al. (U.S. Patent No. 5,787,215, from hereinafter "Kuhara") in view of Yoshida (U.S. Patent No. 5,963,696, from hereinafter "Yoshida").

3. Regarding claims 1-2, 6-7, and 11-12, Kuhara discloses a laser diode module having a laser diode assembly (fig. 6, ref. A) and a lens-filter assembly (fig. 6, ref. B).

Art Unit: 2882

The laser diode assembly has a base (fig. 6, ref. 32), a carrier (fig. 6, ref. 31), a laser diode (fig. 6, ref. 29) mounted on carrier, a cap (fig. 6, ref. 34) fixed and surrounding laser diode, and a holder (fig. 6, ref. 36) around the cap. The lens-filter assembly has two ends with respective holes or cavities and axes (fig. 6). Kuhara further teaches a ferrule (fig. 6, ref. 39) with imbedded optical fiber (fig. 6, ref. 40) with defined spacing between each end and having slant polished ends set in the range of about 4 to 8 degrees (col. 4, lines 21-23) with respect to a plane perpendicular to the axis of the ferrule. The slanting end keeps reflected light from returning to the laser diode (col. 4, lines 23-25). The reference, however, fails to specifically disclose that the second axis is positioned such that it is offset from the first axis. Furthermore, Kuhara does not specifically teach a sleeve portion that fixes the holder to the casing.

Yoshida discloses a laser diode module (fig. 13) having a second axis is positioned such that it is offset from the first axis (fig. 13; col. 15, lines 12-26) and a sleeve portion (fig. 13, ref. 14) that fixes the holder (fig. 13, ref. 14) to the casing (fig. 13, ref. 16).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to offset the first and second axes of the laser diode module and to include a sleeve portion since one would be motivated to maximize the power of light (col. 15, lines 12-26). According to Yoshida, alignment of the laser, lens, and fiber are carried out by the positioning of the holder in the x-y plane such that the most suitable position for optimum power is when the holder deviates from the center axis in the x direction (col. 15, lines 18-19). Because the holder is directly fixed and therefore

dependent on the sleeve's positioning (col. 15, lines 19-21), it would have been obvious to combine the sleeve of Yoshida to the laser diode module of Kuhara so that the second axis would be offset from the first axis so that maximization of power would be achieved (col. 15, lines 12-26).

4. As to claims 3 and 13, Kuhara and Yoshida disclose the laser diode module as recited above. However, the references fail to specifically teach a third hole that allows communication between the first and second holes with the ambient air and a pin that closes the hole.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to add a third hole with a pin since one would be motivated to cool the laser diode when necessary. One skilled in the art would recognize that upon constant excitation and emission of light, the first and second holes of the laser diode module would achieve significant amount of internal heating. Providing ventilation with the ambient air via a third hole would have been obvious to one of ordinary skill in the art at the time the invention was made for reducing the laser diode temperature, thereby expediting the reuse of the module.

Response to Arguments

5. Applicant's arguments filed 13 August 2002 have been fully considered but they are not persuasive.

Art Unit: 2882

Applicant argues that the holder and sleeve of the Yoshida reference have separate axes and therefore do not reflect Applicant's claimed invention as depicted in fig. 1. However, Examiner notes that the Applicant does not specifically claim a second axis offset as being one or separate members. Furthermore, fig. 1 of Applicant's claimed invention depicts the holder with one axis and the sleeve with another. Moreover, Applicant also argues that the Yoshida reference does not disclose a casing. However, the Yoshida reference is clear in referencing a sleeve portion (fig. 13, ref. 14) that fixes the holder (fig. 13, ref. 14) to the casing (fig. 13, ref. 16). Examiner maintains the relevance of the Yoshida reference as suggestive of Applicant's claimed invention in the above rejection.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
